Sample Report

ABSTRACT

The project entitled as – "ICTAK WEBSITE", is a project developed under the platform of Windows, ANGULAR as front-end, NODEJS as back-end and MongoDb as Database. The ICTAK-WEBSITE is a web-based application which is helpful for users as well as the ICTAK authorities. The main objective of this system is to design or develop a software portal for ICTAK for maintaining course details, user information, company memberships and collaboration systems. Users can use this system from anywhere to find out about the details of the courses provided and register for the same. The system allows ICTAK faculty to share relevant Course details, as well as to send email notifications to users. It consists of a Super Admin login along with Admin login.

Admin may add courses, events, offerings, memberships etc. of respected departments through their assigned login. Here users can only view the data and register themselves. The project is developed for automating the complete operations of the ICTAK Courses and users and the outputs produced by the system are concise. The success of the system largely depends on how clearly the problem is defined, investigated and properly carried out through the choice of solution.

INTRODUCTION

As technology advances, the internet is becoming ever popular. Website has become an essential part. Often websites of an institution are used as major requirements to rate it. Thus having a website is essential for any major organization. On this project we will develop ICTAK-WEBSITE. It is a web-based dynamic application which is helpful for users as well as the ICTAK authorities. The SuperAdmin has the control over the website. The admin has privilege only to the pages assigned by superadmin. The user can view the pages and register themselves.

PROJECT OBJECTIVE

The main objective of this system is to design or develop a software portal for ICTAK for maintaining course details, user information, company memberships and collaboration systems. Users can use this system from anywhere to find out about the details of the courses provided and register for the same. The system allows ICTAK faculty to share relevant Course

details, as well as to send email notifications to users. It consists of a Super Admin login along with Admin login.

MODULE DESCRIPTION

This project contains three modules:

- 1. SuperAdmin Module
- 2. Admin Module
- 3. User Module

SuperAdmin Module

- · Login
- · Admin Panel
- · Add new Courses, Events, Staffs, Admin, Testimonial.
- · Update/Delete Course. Events, Staffs, Admin, Testimonial
- · View Course, Events, Staffs, Admin, Testimonial, Membership lists, Partnership Members list and course registered users list

Admin Module

- Login
- · Admin has privilege over the pages assigned by SuperAdmin

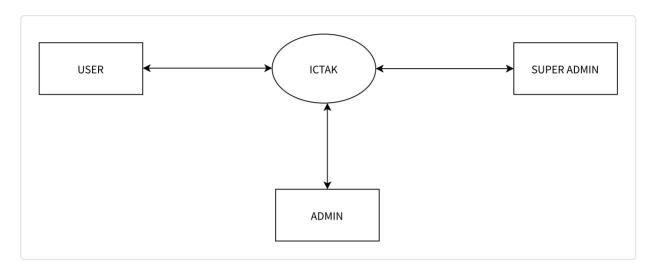

User Module

- Login
- · Home Page
- · About US Page
- · View details about courses and Events
- Enroll for Course and Events
- · Membership and partnership registration

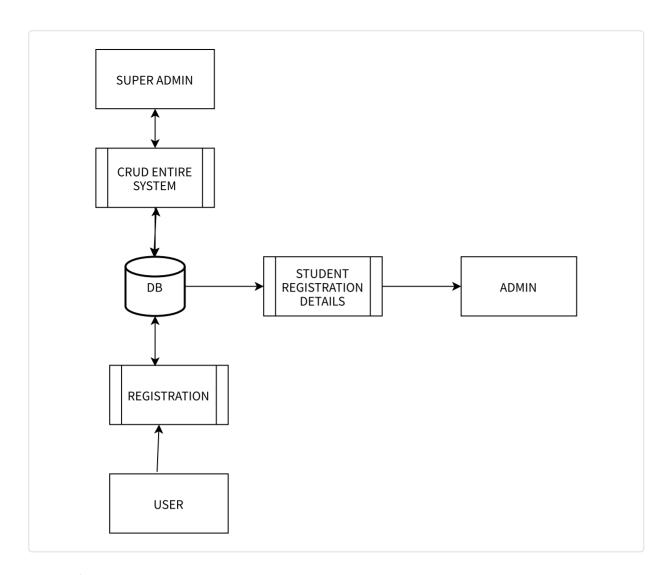

- Paatsaala
- · Contact Us Page
